

Tania R. Allard

RESEARCH SOFTWARE ENGINEER · DATA SCIENTIST

276 Greenbrow Road, Wythenshawe, M23 2UF

☎ (+44)79 400 30 706 | ✉ tania.sanchezmonroy@gmail.com | 🏠 www.bitsandchips.me | 📱 trallard | 🌐 tania.sanchezmonroy | 🐦 @ixek

Formerly Tania Sanchez Monroy. Eligible to work in the UK. | A passionate innovator with experience in bringing new technology to bear on complex challenges. Strong communication skills and able to present abstract concepts in an accessible way to all organisational levels. Diversity in STEM advocate and promoter of reproducible and open research practices across disciplines.

Education

The University of Manchester

Manchester, UK

PHD IN MATERIALS SCIENCE / COMPUTATIONAL MODELLING

Jan 2013 - Dec 2016

Thesis: Modelling and characterisation of compliant and hydrated materials. Supervised by Prof. Brian Derby

- Developed algorithms and data analysis pipelines to model the behaviour of biological tissues in Python and R. Such algorithms reduced the computational time by 70% as well as the associated errors by 30% compared to the state of the art.
- Developed a sophisticated data acquisition and preservation strategy for real life data sets between 2 and 25GB size. These were posteriorly analysed using complex data analysis pipelines and classification algorithms in Python and R (numpy, pandas, scikit-learn, tidyverse).
- Interpreted complex simulation data using statistical methods implemented in R.
- Worked in a cross-disciplinary team to develop a unique multi-scale simulation technique and implemented the methodology to explain complex biological phenomena using own generated computational scripts and packages written in Python, FORTRAN, MATLAB and C++.

UNAM

Mexico City, Mexico

BENG IN MECHATRONICS ENGINEERING

Aug 2016 - May 2011

Topics covered include: multivariate calculus, statistics, linear algebra, robotics, automation and control, design, mechanics of solids, fluids mechanics, electronics. Major: computational modelling and medical devices

Relevant Experience

Hello Soda

Manchester, UK

DATA/RESEARCH ENGINEER

June 2018-present

- Planned, implemented and supervised the further improvements of a more robust data platform that allows for continuous delivery, monitoring, and logging of machine learning and natural language processing models (over 60 models with incoming data from customers in Europe, Asia, USA, and Latin America).
- Developed internal policies regarding data and software best practices, documentation, and model deployment. Managed junior members of the team: day to day tasks monitoring, personal development and led discussions on the future of the company technology.
- Introduced fortnightly documentation sprints and show and tells for the tech team (data, infrastructure, engineering).
- Developed tools and infrastructure to scale, support and improve the data team tasks, from data extraction, to model development, training, and optimisation, to taking models into production.
- Leveraged the use of tools such as Elasticsearch, Airflow, Pachyderm, Docker, Rstudio, Jupyter, cloud solutions, and Kubernetes within the development areas of the business.
- Drove the adoption of tools and processes to improve our data models reproducibility, provenance (lineage), and sustainability.

Freelance / consultant

Manchester, UK

DATA AND REPRODUCIBILITY CONSULTANT

Nov 2016 - present

- Consulted start-ups and researchers on reproducible data analysis workflows, open data, data modelling, and aided them to develop strategies to satisfy their data engineering needs. Reducing in most of the cases the computational times and optimised their data intensive workflows.
- Created and presented executive dashboards to show data insights using R Shiny apps, Plotly, and d3.js
- Implementation and scaling of data pipelines, from ETL to model deployment, monitoring and task scheduling.

The University of Sheffield

Sheffield, UK

RESEARCH SOFTWARE ENGINEER / MACHINE LEARNING TEAM MEMBER

Nov 2016 - June 2018

- Main contributor to the European funded projects OpenDreamkit as well as to a number of open source projects, such as project Jupyter, GPy for Gaussian Processes, RopenSci, among others.
- Used RESTful web design using Flask, Jinja2, JQuery, JS and Django for the development of multiple web apps.
- Developed numerous data analysis pipelines, from wrangling to prediction and results dissemination, for research projects in Linguistics (Natural Language Processing), Bioinformatics (Classification and regression), Materials science (regression), and Geography (geolocation data analysis) using R and Python.
- Implemented the use of third parties API's and web scraping to collect raw data for posterior analysis and modelling.
- Trained and supervised junior colleagues and students, with a particular focus on reproducible workflows, software development best practices, High-Performance Computing, and open source projects.
- Worked in policy creation at both, a national and international level as member of the UK Research Software Engineering and NUM-Focus Diversity and Inclusion in Scientific Computing committees.
- Developed interactive dashboards and data visualizations using d3.js, Shiny, Bokeh, and Plotly to disseminate project findings.
- Developed tools to support reproducible research and literate programming.

NHS, Manchester business school

Manchester, UK

CONSULTANCY FELLOW

February - October 2016

- Liaised with multiple stakeholders, from high-level directors to patients within the NHS to identify organisational needs.
- Led data collection initiative and performed the statistical analysis of the collected data. This allowed to assess the efficacy of the Healthier Together programme and predict both desired and undesired outcomes of resources reallocation.
- Developed a framework for specialist hospitals within the Greater Manchester area to improve the sharing of institutional knowledge, improving efficiency of communication, and eliminating 50% of unnecessary meetings.

University of Southern California, MEMS

California, USA

ENGINEERING INTERN

2011

- Performed real-time data collection and analysis for implantable drug delivery devices. The implemented models allowed for 20% increase in dose tracking and fault detection accuracy.
- Architected and implemented analytics and visualization components for a device data analysis platform to predict potential hardware failures.

Skills

Experienced open source developer/maintainer with a specialization in scientific computing, including visualization, data analysis, and applied machine learning.

Programming languages

Python, R, C/C++, MATLAB, Fortran, shell (bash) , Julia

Web technologies

HTML, css/sass, Flask, jQuery, Jinja, Django, JavaScript

Data science and data analysis

R (and tidyverse), Sickit-learn (Python), SciPy, Pandas, Numpy, SQL, Spark

Dev Ops & data engineering

Docker, Kubernetes, Elasticsearch, Kibana, Airflow, Pachyderm

Software engineering

git, Heroku, CI/CD, testing, API development

Productivity tools

LaTeX, Jupyter notebooks , R markdown

Machine learning

Linear/logistic regression, Clustering, k-NN, Random Forests, PCA, NLP, Decision trees

Visualisation and reporting

D3.js, Bokeh, Seaborn / Matplotlib, Plotly, Shiny, ggplot, Dash, vega-lite

Cloud solutions

Microsoft Azure, Amazon Web Services

CAD/ CAM/ FEA

Abaqus, Ansys, CATIA, SolidWorks

Engineering / mathematical software

LabView, SIMULINK, MATLAB (incl. optimisation toolbox), Mathematica

Languages

Spanish (mother), English (proficient), French (intermediate)

Professional activities

Conference committee , PyCon LatAm	2018-2019
Elected trustee , Python UK Association	2018
PyLadies NorthWest UK founder , UK	2018
Blogger , The Python Software Foundation	2018
PyCon Charlas chair , PyCon US	2018
Assessment group member , DISC NUMFOCUS	2018
Mentor , Hackmed and HackSheffield	2018
Maintainer , Software Carpentry Python Ecology Lesson	2018
ELife ambassador , ELife Innovation	2018
Open source / working in the open mentor , Mozilla Open Leaders	2018
Core committee member: Surveys and community , RForwards	2017-18
Diversity chair , Juliacon	2017-18
Reviewer , ReScience	2017-18
Reviewer and editor , Journal of Open Source Software (JOSS)	2017-18
Elected member , UK Research software engineering committee	2017-18
Data scholar , Data study workshop: Alan Turing Institute	2017
Diversity and equality chair, Talks co-chair , 2nd Research Software Engineering Conference	2017
Diversity and equality committee member , Computer Science, University of Sheffield	2016-18
Lead Python Instructor: Manchester and Sheffield , Code First Girls	2017-18
Talks co-chair , 2nd Research Software Engineering Conference	2017
Supporting organiser , Nanoprinting conference	2016
Cultural affair officer , Manchester Mexican Society	2015
Cultural affairs officer , Mexican Society in the UK	2014
Volunteer , Manchester Girl Geeks, The British Science Association, Coding Dojo	2013-17

Talks and workshops

Oct 2018 Mozfest , Making Mozfest inclusive and accessible	<i>London, UK</i>
Oct 2018 PyLadies , Hacktoberfest: what is OSS?	<i>Manchester, UK</i>
Sep 2018 PyCon UK , Reproducible workflows in Python	<i>Cardiff, UK</i>
Sep 2018 PyConUK , OSS contributions for beginners:workshop	<i>Cardiff, UK</i>
Aug 2018 RAPIDS , A crazy little thing called reproducible science	<i>London, UK</i>
Jun 2018 Women in Sage , Women in Open Science	<i>Montreal, CA</i>
May 2018 PyCon US , Reproducible workflows in Python:workshop	<i>Cleveland, USA</i>
Feb 2018 Her + data , The importance of community in the use of data	<i>Manchester, UK</i>
Oct 2017 Manchester R user group , What has reproducibility ever done for us?	<i>Manchester, UK</i>
Sep 2017 RSE conference , Workshop: Reproducible data analysis using Jupyter notebooks	<i>Manchester, UK</i>
Jun 2017 Machine Learning retreat , Reproducible ML workflows	<i>Sheffield, UK</i>
Apr 2017 Nanobruecken , Characterisation of thin hydrated films	<i>Germany</i>
Dec 2015 MRS Fall , Viscoelastic and poroelastic characterisation and modelling of thin films	<i>Boston, USA</i>
Jun 2015 Biomaterials showcase , Modelling the mechanical properties of compliant and hydrated films	<i>Manchester, UK</i>
Apr 2015 Nanobruecken , Modelling the viscoelastic properties of PDMS	<i>Germany</i>
Jan 2015 Winter School, UNAM Engineering faculty , Nanomecanica de materiales biológicos (invited talk)	<i>Mexico</i>
Jun 2013 Wrightington Gold Medal , Optimised pre-operative planning for elbow arthrolysis	<i>Wigan, UK</i>

Honors & Awards

John Pinner Award for exceptional community service , UKPA	2018
Diversity scholarship: speakers , PyCon US	2018
Outstanding mentor , University of Sheffield	2017-2018
SSI Fellow , Software Sustainability Institute	2017
Diversity scholarship , Diversity in Scientific Computing, NUMFocus	2017
Recognition award: staff , University of Sheffield	2017
1st prize: student talk , Hysitron meeting	2017
2nd place: Social venture , Venture further business competition	2016
1st place , venture further business competition	2015
1st place: postgraduate presentation , Writington gold medal	2013
CONACYT/Manchester scholar , University of Manchester	2013-16
Academic excellence scholarship , SEP	2013-2016
USC Viterbi: Engineering scholarship , University of Southern California	2011
Academic excellence scholarship , UNAM-SEP	2008-11

Mentoring

University of Sheffield

Sheffield, UK

PHD STUDENTS MENTOR

September 2017 - present

- Provided mentorship and guidance for PhD students completing their graduate studies.
- Was awarded the distinction of outstanding mentor: (<https://www.sheffield.ac.uk/rs/ecr/mentoring/dotm>).

Mozilla Open Leaders Mentor

USA, UK

MOZILLA FOUNDATION

February 2017 - present

- Invited to act as a mentor during Round 5 of Mozilla's Open Leadership Training.
- Meeting with assigned project lead to provide insight and support with their OSS projects.
- Gained valuable coaching skills and connections across the Mozilla and open source community.

Technical mentor

Sheffield, UK

HACKMED AND HACKSHEFFIELD

January 2017 - present

- Acted as technical mentor during the events, providing guidance and expertise to the teams competing.
- Was involved in the organisation, advertising, and logistics of the events.

Additional projects

Open NASA

USA / UK

NASA DATANAUT

Sept 2017 - present

- Organised community events focused on the analysis and visualization of Open NASA data sets.
- Worked on the identification and development of effective visualization tools for multiple dictionaries.
- Currently working on the development of Python libraries to access some NASA APIs.

Mozilla Foundation

USA, UK

MOZILLA OPEN LEADERS: CODING FOUNDATION

Sept 2017 - present

- Founder of Coding Foundation, a programme aimed to support and encourage the inclusion and retention of women and members of the LGBTQ community in computer science and tech related undergraduate courses all around the world.
- Selected for Round 4 of Mozilla's Open Leadership program where I received training and developed skills in open leadership, project management, building communities, open communications and running awesome events.
- The project is in current development as part of a wider strategy within Yorkshire to increase fair representation in undergraduate courses.
